OPENSTACK-ANSIBLE ADJUTANT

tags

openstack, adjutant, cloud, ansible

category

*nix

This Ansible role installs and configures OpenStack adjutant.

This role will install the following Upstart services:

- adjutant-api
- adjutant-processor

1.1 Required Variables

```
adjutant_service_password
adjutant_rabbitmq_password
adjutant_galera_password
adjutant_galera_address
```

1.2 Example Playbook

```
- name: Install adjutant server
  hosts: adjutant_all
  user: root
  roles:
    - { role: "os_adjutant", tags: [ "os-adjutant" ] }
  vars:
    external_lb_vip_address: 172.16.24.1
    internal_lb_vip_address: 192.168.0.1
    adjutant_galera_address: "{{ internal_lb_vip_address }}"
    adjutant_galera_password: "SuperSecretePassword1"
    adjutant_service_password: "SuperSecretePassword2"
    adjutant_rabbitmq_password: "SuperSecretePassword3"
```

1.2.1 Dependencies

This role needs pip \geq 7.1 installed on the target host.
